

Proposed Data Base Price Increase

**Presented by
Wally Tyner**

Data Base Pricing

- **Prices have not increased since 2000 with the release of Version 5**
- **Costs, obviously have increased**
- **Data base sales were high this year (\$179,500) with the release of Version 6**
- **Sales will fall in 2005-06, and we need an increased revenue flow from data base sales to help offset increased costs**
- **The following slide provides our proposal for a 15 percent increase**

Data Base Pricing
