GENERAL INFORMATION

Dates and Location

June 17-19, 2020 | WebEx

Objective and Format

The goal of the annual conference on economic analysis is to promote the exchange of ideas among economists conducting quantitative analysis of global economic issues.

The conference features specially organized and contributed paper sessions. The organized sessions have been developed by members of the GTAP Network to highlight a specific area of research and/or policy analysis. The contributed paper sessions were selected through a peer review process and subsequently grouped to reflect the varied themes being addressed by members of the GTAP Network. The content of these sessions reflects the overall conference themes.

"Global Economic Analysis Beyond 2020"

- Achievements in SDGs
- Challenges of regional integration and globalization
- Income distribution impact of economic policy
- Globally coordinated common tools of economic analyses

Papers from each session can be accessed through the conference homepage on the GTAP website:

www.gtap.agecon.purdue.edu/events/conferences/2020/ ISSN 2160-2115 (online)

Stay Connected with GTAP!

Connect with us on social media and subscribe to the GTAP-L Mailing List where you can solicit advice from others in the GTAP Network, keep up-to-date on model and data base releases, upcoming event offerings, and job postings in our research community!

WEBEX SETUP

Quick Setup

STEP 1

Click the meeting link or download, save/import, and open the calendar invite for the session(s) you plan to attend from the schedule below.

STEP 2

If it is the first time you are joining a WebEx meeting on your device, you will be prompted to download and install the WebEx app.

STEP 3

Enter your name (no screen names/aliases) and email. If prompted for a meeting number or password, locate and enter those details from the schedule. Click to join.

STEP 4

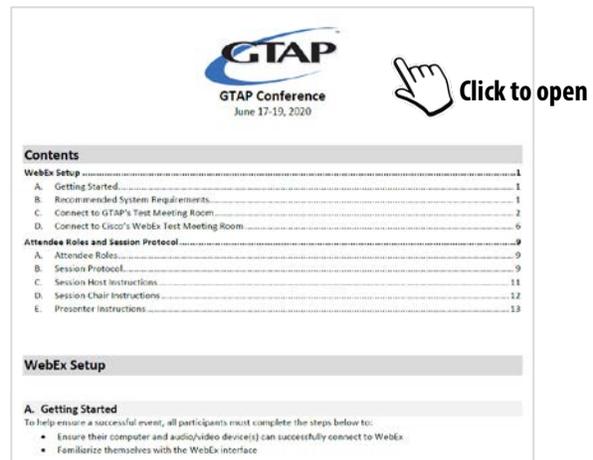

To connect your audio, select “Call Using Computer”, and select your preferred audio devices. Note that only session hosts, chairs, and presenters are required to connect a microphone. Since listeners will not be permitted to speak, microphones are not required for all attendees.

If your internet is capable of supporting a video connection, your device can be selected in this step as well, but video is not required.

When your preferred devices have been selected, click the connect button.

NEED ADDITIONAL HELP?

Follow the instructions detailed in the [GTAP Conference WebEx Setup, Roles, and Session Protocol document](#).

Special Notes

- **Muting Microphones** - Only session hosts, chairs, and presenters will be allowed to speak. For those connecting microphones, everyone expect the person currently speaking must remain muted. Click the “Microphone” icon in the meeting control panel (#1 in image below) to mute yourself.
- **Sharing Content (Presenters)** - Before sharing presentations, presenters should already have the document open in the background, then click the “Share content” icon in the meeting control panel (#2 in image below) and “Share” on that application (e.g., PowerPoint, Acrobat). To stop the share at the end of the presentation, roll over the top of the window to expose the share toolbar and click “Stop Sharing”.
- **Discussion Periods** - During discussion periods, all questions/comments must be entered into the “Chat” area accessible by clicking the “Chat” icon in the meeting control panel (#3 in image below). The chair will read questions aloud for the presenter to address.

ATTENDEE ROLES AND SESSION PROTOCOL

Attention to the following details are essential to the success of the conference. Additional details can be found in the [GTAP Conference WebEx Setup, Roles, and Session Protocol document](#). Please contact Ginger Batta (gbatta@purdue.edu) with any questions.

Attendee Roles

- **Session Host** - Designated Center for Global Trade Analysis staff member in charge of:
 - Starting/launching the meeting/session room
 - Keeping presentations and discussions on time by providing verbal time remaining queues
 - Ensuring that all attendees are muted except the one person currently speaking
 - Ending the meeting
- **Session Chair** - Designated person in charge of:
 - Delivering a 5 minute (max) overview of the session including introducing the host, chair, overall topic, and each presenter, as well as reminding attendees about protocol and etiquette
 - Managing each discussion period
 - Delivering a 5 minute (max) session closing, recapping and thanking everyone for attending
- **Presenter** - Designated person scheduled to present during each session
- **Listener** - General attendee not serving in any other role during a session

Session Protocol

- The session host will launch each session 10 minutes prior to its scheduled start time giving chairs and presenters a final chance to connect before the session officially begins to ensure their audio/video is working properly.
- Each session will begin with the chair delivering a 5 minute (max) introduction that will include introducing themselves, the host, the session topic, and each presenter, as well as reminding everyone of the following protocol.
 - All attendees except the current person speaking (host, chair, presenter) will be muted. No exceptions.
 - Presentations will last 20 minutes. The session host will verbally prompt the presenter when there are 2 minutes remaining in their allotted time. When the 20 minutes has elapsed, if the presentation has not already ended, the host will prompt again and the chair will immediately move onto the discussion period, even if the presentation is not complete.
 - Discussion periods will last 10 minutes and immediately follow each presentation. Listeners will enter their question (to everyone) in the chat board. The chair will accept questions in the order received, read the listener's name and question aloud, and then allow the presenter to respond verbally. Presenters are encouraged to re-state the question before answering. This will continue until the host prompts that there are 2 minutes remaining in the allotted discussion time. At that point, the chair should begin wrapping up the discussion.
 - Following all but the final presentation, there will be a 5 minute transition period to allow the next presenter time to load/share their presentation. Transition periods are not extensions of time for the previous presentation/discussion period. The session host and chair will end all presentations and/or discussions at the designated times in order to stay on schedule. During this transition time, the chair will re-introduce the next presenter.
 - At the end of each session, the chair will give a 5 minute (max) wrap-up, recapping the session and thanking everyone for attending.

GUIDELINES AND ETIQUETTE

Attention to the following details are essential to the success of the conference. Additional details can be found in the [GTAP Conference WebEx Setup, Roles, and Session Protocol document](#). Please contact Ginger Batta (gbatta@purdue.edu) with any questions.

All Attendees

- The presentation schedule is set and the session hosts will ensure it is followed. Disruptions, technical or otherwise, will not allow for additional time. If a presenter does not connect on time, or at all, the host and chair will maintain the schedule with presentation order and start/end times not being adjusted.
- All attendees must connect using their real names. No screen names.
- Listeners will be muted. The only individuals permitted to speak are the host, chair, and presenters.
- Everyone should connect from as quiet a space as possible with minimal or no background noise.
- If you connect video, others will be able to see what is in your camera's field of view. Be mindful of this and the following tips.
 - Attire - Wear work-appropriate attire.
 - Camera - Frame your camera shot so that you are seen squarely in the feed. Sit at eye-level, so you can look into the lens and try to position yourself so that it shows you from the waist up.
 - Lighting - Make sure there is enough light in the room you are in, but not too much back-light (don't sit in front of a sunny window) to ensure you can be seen.
- For those connecting by laptop, it is recommended to plug in the power cord instead of running on battery, which can adversely affect audio/video quality if running low. Ethernet connection over Wi-Fi, is also recommended, if possible.
- Close all unnecessary apps and programs to eliminate potential disruptions and straining bandwidth.
- During discussion, please remember to attack the problem, not the person. There may be differences of opinion and you may not agree with everything that is presented or discussed, but please remain open to hearing other perspectives and methods. If you disagree with something, respectfully challenge the idea – not the person. Constructive discussions obtain the best results.

Presenters

- Practice, practice, practice, to ensure your presentation does not exceed 20 minutes.
- If you made changes to your paper or presentation after the submission deadlines, make sure the latest versions are uploaded to the GTAP website before the conference. See the "Final Presentations" section of the [conference homepage](#) for instructions.
- Re-introduce yourself and your affiliation at the beginning of your presentation.
- During your presentation's discussion period, be sure to re-state all questions before answering.

Listeners

- Listeners can connect to and jump between sessions at any time.

SPECIAL RECOGNITION

Conference Organizers

**Center for Global Trade Analysis
Purdue University**

The Global Trade Analysis Project (GTAP) is a global network of researchers and policy makers conducting quantitative analysis of international policy issues within an economy-wide framework. GTAP is coordinated by the Center for Global Trade Analysis, which is housed in the Department of Agricultural Economics at Purdue University. The Center for Global Trade Analysis' mission is to provide leadership in economic policy analysis through better data, fostering collaboration, and research. The centerpiece of Global Trade Analysis Project is the GTAP Data Base, a fully documented and publicly available, analytical data base for the global economy, which contains detailed country data, linked through bilateral trade, transportation and protection. Accompanying this data base is a set of GTAP-based models used and developed by network members. The GTAP Data Base and analytical framework are used by thousands of researchers around the world. Originally, the majority of the research was related to international trade policy issues. Today, GTAP is still the most widely used tool for trade policy, but its use has expanded into poverty, international migration, foreign investment, climate change, environment, energy, and biofuel policies. GTAP has become a common "language" for many of those conducting analysis of global policy issues with GTAP-based results becoming increasingly influential in decision making around the world in trade, climate change, energy and the environment.

www.gtap.agecon.purdue.edu

Located in the heart of the fascinating city of Tokyo, The National Graduate Institute for Policy Studies (GRIPS) is an international premier policy school with the aim of contributing to the betterment of democratic governance around the world. We excel at providing interdisciplinary education for future leaders in the public sector and conduct research on contemporary policy issues to generate innovative solutions.

Founded in 1997 as a stand-alone graduate institute, GRIPS is comprised of world-class academics and distinguished practitioners with expertise in public sector policy formulation and management. Around 20% of the faculty and 70% of students are recruited from outside Japan. Our vibrant, diverse student body consists of almost 400 members hailing from 63 countries and regions – all with the ambition to advance good governance across the globe or contribute to policy related research.

We offer a diverse array of Master's and Doctoral Programs, from which students cultivate the ability to analyze issues and suggest solutions, develop interdisciplinary knowledge and skills that span related fields, and gain practical expertise. In addition to our degree programs, we also offer executive level short term training programs across a wide range of themes.

Since our inception, our achievements in promoting good governance are considerable and far-reaching. Today, our impressive Alumni network of over 4,000 strong are actively shaping policy in more than 100 countries around the world.

SPECIAL RECOGNITION

Wallace E. Tyner: 1945–2019

The GTAP community and Purdue University experienced a great loss in August of last year with the passing of Wally Tyner.

As Department Head of Purdue’s Department of Agricultural Economics from 1989-2002, Wally oversaw the establishment of the Center for Global Trade Analysis and facilitated the formation of the GTAP Consortium – a key ingredient in GTAP’s longevity. When he returned to the faculty in 2003, Wally initiated a cutting-edge program of research related to biofuels and their linkages to energy, agriculture and the environment. In this context, he became a heavy user of the GTAP Model and its derivatives: GTAP-AEZ and GTAP-BIO. His research in this area earned him lifetime career recognitions from his professional associations (AAEA, AAAS and IAAE), industry (US Association for Energy Economics), as well as from Purdue University (the Morrill Award for outstanding career achievements with a societal impact), among many other awards.

Wally was a great role model and advocate for policy-relevant, inter-disciplinary research. He was also an excellent mentor for students and young professionals. The following is excerpted from his address on the occasion of being awarded AAEA Fellow in July, 2019:

“I have been blessed to work with over 75 great graduate students – and all of you know that it is the graduate students who do all the hard work!

In addition to the graduate students, I have had many wonderful colleagues, both in agricultural economics and also in many other disciplines. My two colleagues accompanying me on the stage today, David Zilberman and Tom Hertel, have been inspirations throughout my career. Farzad Taheripour has been a long-standing and wonderful colleague at Purdue, along with Otto Doering and many others.

I also have some advice for graduate students and young professionals: Don’t worry if you sometimes think you are not the brightest star in the firmament. My experience has been that hard work overcomes almost any deficiency in other areas. The key is to learn to think like an economist – to approach problems with the tool that matches the problem rather than trying to force fit a tool to your problem.

Societal problems do not fall neatly into disciplinary boxes. So, if you really want to address important societal issues, it often means leaving the comfort of your own discipline and working with other scientists. It is harder to do multi-disciplinary work than to stay within the confines of economics, but the rewards are greater.

I cannot claim that my life has been planned -- it has been largely serendipity. However, you must take advantage of those opportunities when they arise, and that is what I have tried to do.”

In recognition of his tremendous contributions to the GTAP community, the Center for Global Trade Analysis established the Wallace E. Tyner Travel Scholarship to support travel to the annual meetings by a young professional engaged in policy relevant, interdisciplinary research.

SPECIAL RECOGNITION

Travel Funding Award Recipients

Due to the conference being moved online and recipients not incurring any travel expenses, travel funding awards for this conference were by recognition only. Congratulations to the following recipients!

Ken Pearson Recipient

Andressa Proque

Federal University of Juiz de Fora (Brazil)

Fuel tax, cross subsidy and transport: assessing the effects on income and consumption distribution in Brazil

Session #13 (pg. 25)

Wallace E. Tyner Recipient

Xin Zhao

Joint Global Change Research Institute, PNNL (United States)

Impacts of climate and biophysical variability on global agriculture markets

Session #38 (pg. 54)

Alex Meeraus / Thomas Rutherford Recipient

Jingwen Li

2021 CONFERENCE PREVIEW

24th Annual Conference on Global Economic Analysis
“Global Food System: Opportunities and Challenges”

Click to watch!

COLORADO STATE UNIVERSITY

Fort Collins, Colorado, USA | June 23-25, 2021

Thematic Focus

The proposed overall theme of the conference is “Global Food System: Opportunities and Challenges” with subthemes on:

- Agricultural innovation and resource constraints
- International trade and supply chain linkages
- Inclusive economic growth
 - Climate change and environmental sustainability
 - Food-energy linkages
- Food and agricultural policies
- Policy and regulatory harmonization

Important Dates/Deadlines

Submissions	November 2020 – January 15, 2021
Abstract Review	mid-January – mid-February 2021
Status Notifications	early March 2021
Final Paper Submission	April 15, 2021
Early Registration	April 15, 2021
Late Registration	April 30, 2021
Registration Payment	May 7, 2021

ABOUT GTAP

What is GTAP?

- The Global Trade Analysis Project (GTAP) is a network of researchers and policy makers conducting quantitative analysis of international policy issues, with the goal of improving the quality of quantitative analysis of global economic issues within an economy-wide framework.
- Founded in 1992 by [Thomas W. Hertel](#), GTAP has become the common "language" for conducting analysis of global policy issues, leading to GTAP-based results being influential in decision making around the world in trade, climate change, energy, and the environment.

Who is GTAP?

- The Global Trade Analysis Project is coordinated by the [Center for Global Trade Analysis](#), which is housed in the [Department of Agricultural Economics](#) at [Purdue University](#) in West Lafayette, Indiana, USA. The Center's mission is to provide leadership in economic policy analysis through better data, fostering collaboration and research.
- GTAP is truly a global project with nearly 21,000 [GTAP Network](#) members worldwide representing 176 different countries. The GTAP Network is intended to ease the transfer of skills and knowledge, foster the exchange of ideas among the applied general equilibrium community, and improve collaboration and encourage joined projects.
- Guidance and base-level support for the project are provided by the [GTAP Consortium](#), which unites members from government agencies, international institutions, the private sector, and academia.

What do GTAP and the Center for Global Trade Analysis offer?

- The centerpiece of the Global Trade Analysis Project is the [GTAP Data Base](#), a global data base describing bilateral trade patterns, production, consumption, and intermediate use of commodities and services. The GTAP Data Base is utilized by thousands worldwide and is a key input into contemporary applied general equilibrium analysis of global economic issues.
- The underlying framework for the theory and structure for analysis come from [two global general equilibrium models](#), the Standard and Dynamic GTAP Models, which are developed and maintained by the Center for Global Trade Analysis.
- The Center for Global Trade Analysis also offers a number of [conferences](#) and [courses](#) to help promote GTAP-based research, education, collaboration, and outreach, many of which have led to the 33,000+ citations to various GTAP-based research on Google Scholar. In addition, the Center also publishes the [Journal of Global Economic Analysis](#), which provides an open access, peer-reviewed platform for publication and dissemination of innovations concerning applied general equilibrium modeling.
- Review the following pages for further offerings and details.

Questions?

Please direct questions to contactgtap@purdue.edu.

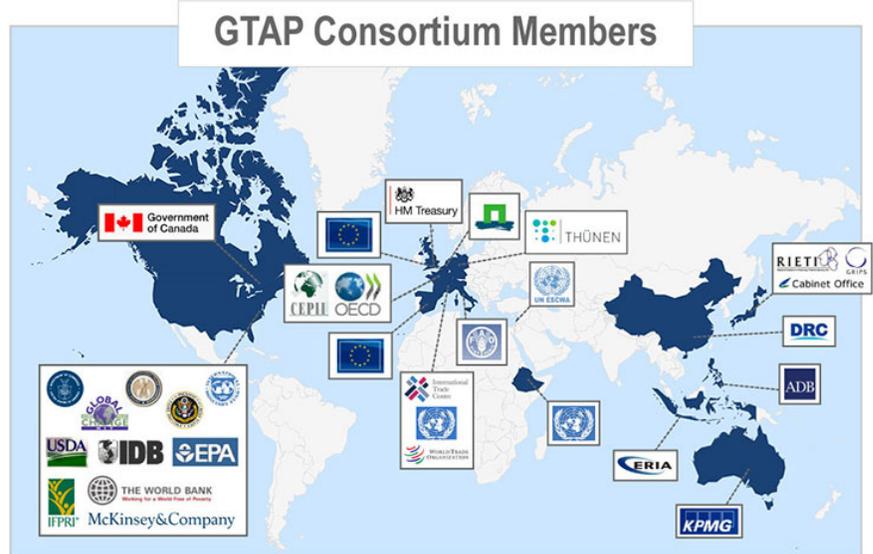

GTAP CONSORTIUM

GTAP Consortium

Guidance and base-level support for the Global Trade Analysis Project is provided by the GTAP Consortium, which unites members from government agencies, international institutions, the private sector and academia. Members of the GTAP Consortium are represented on the GTAP Advisory Board which advises the Center on matters of policy, research and funding.

Membership Advantages

- GTAP Data Base Access** - Consortium members receive free, immediate access throughout the development phase of the GTAP Data Base, including pre- and interim-releases not available to the public. This exclusive access places consortium members at the cutting edge of developments in the GTAP community and provides access to new data sets as they are developed.
- GTAP Advisory Board Counsel** - GTAP Consortium members meet annually with the Center for Global Trade Analysis at the GTAP Advisory Board Meeting to counsel on future directions of the GTAP Data Base, modeling framework, policy and research agenda. Participation in the GTAP Advisory Board meetings provides members access to the latest developments in modeling and data. By being at the table where key strategic decisions for GTAP are made, members have an important opportunity to influence the future direction of the Global Trade Analysis Project.
- Collaboration** - The GTAP Advisory Board meeting serves as a venue for promoting multinational collaboration between consortium agencies, often leading to research and funding opportunities.
- GTAP Model and Data Innovations** - GTAP Consortium members may obtain preferential access to new model developments and other supplementary datasets developed by the Center for Global Trade Analysis, consortium members and other network collaborators.
- Center for Global Trade Analysis Visits** - GTAP Consortium staff members are welcome to visit the Center to collaborate on data and research projects of mutual interest to the GTAP Network.
- Prestige/Supporting the Greater Good** - By joining the GTAP Consortium, members enter a club which includes the majority of the world's leading research institutions guiding policy makers on matters of global trade and environmental policy. This community firmly believes that through collaboration in the provision of public goods, such as the GTAP Data Base and Model, it can improve quality of global economic analysis world-wide.

Member Responsibilities

The initial responsibility is to make a two-year minimum commitment to provide annual funding (currently USD \$20,435/year) in the form of base-level support for GTAP. These funds are used to help fund core GTAP staff at Purdue University. The second responsibility consortium members are expected to take on is an active interest in GTAP and promote its responsible use in economic analysis. Finally, members are also expected to help keep GTAP on-track so that it is well-placed to contribute to public debate on issues of global trade analysis.

If you are interested in finding out more about becoming a consortium member, please email contactgtap@purdue.edu.

GTAP DATA BASE

GTAP 10 Data Base

The centerpiece of the Global Trade Analysis Project is the GTAP Data Base, a fully documented, publicly available global database containing complete bilateral trade information, transport and protection linkages. The GTAP Data Base represents the world economy and is utilized by thousands worldwide as a key input into most applied general equilibrium (AGE) analysis of global economic issues. A documented overview of GTAP 10 is available in the *Journal of Global Economic Analysis*.

GTAP
Global Trade Analysis Project

GTAP 10 Data Base
WHAT'S NEW

www.gtap.agecon.purdue.edu/databases/v10/

4 Reference YEARS
2004 2007
2011 2014

Geographic Coverage

- 121 countries representing 98% of world GDP and 92% of world population
- 20 aggregate regions
- 50 new/updated input-output tables
- multi-year country input-output table allocation by GTAP reference year (as data permits)

Sectoral Coverage
Expansion of manufactures and services, for a total of
65 Sectors

New Sectoral Concordances
Using the latest CPC and ISIC classifications

Other Updates

- Energy, emissions and macro-economic data
- Tariff data and agricultural domestic support
- Bilateral trade data & time-series of bilateral merchandise trade data

International Margins Data
Improved estimates

GTAP 10 Data Base (USD)						
	Standard Price		Lower-Middle Income Economy		Low Income Economy	
	New	Upgrade	New	Upgrade	New	Upgrade
Government/Private Sector	\$6,240	\$4,060	\$3,740	\$2,430	\$2,500	\$1,630
Library Academic	\$4,620	\$3,000	\$2,770	\$1,800	\$1,850	\$1,200
Multiple Academic	\$2,310	\$1,500	\$1,390	\$900	\$920	\$600
Single Academic	\$1,220	\$790	\$730	\$470	\$490	\$320

For complete details on licensing and pricing, please visit: www.gtap.agecon.purdue.edu/databases/pricing.asp

GTAP SATELLITE DATA AND UTILITIES

GTAP 10 Satellite Data and Utilities

The GTAP Satellite Data and Utilities allow users to more easily use and adapt the full suite of GTAP Models for analysis of global trade and environmental issues.

Purchasers of the GTAP 10 Data Base receive access to the following data sets free of charge!

Currently Available

- **Non-CO₂ Data Base** - Emissions are reported for three types of non-CO₂ GHGs – CH₄ (methane), N₂O (nitrous oxide) and the group of fluorinated gases (F-gases), and cover four reference years of the GTAP 10 Data Base. Each emission flow is associated with one of the four sets of emission drivers: output by industries, endowment by industries, input use by industries and consumption by households.
- **GTAP-E Data Base** - GTAP-E provides carbon dioxide (CO₂) emissions data distinguished by fuel and by user for each of the 141 regions in the GTAP Data Base, and is based on GTAP 10 and extended energy balances compiled by the International Energy Agency (IEA).
- **GTAP-Power Data Base** - GTAP-Power is an electricity-detailed extension of the GTAP Data Base. The GTAP 'ely' sector is disaggregated into transmission & distribution, nuclear, coal, gas (base and peak load), oil (base and peak load), hydroelectric (base and peak load), wind, solar, and other power technologies. These new sectors are combined with the original GTAP sectors resulting in a data base with 76 sectors and 141 regions.
- **GDyn Data Base** – GDyn augments the standard GTAP Data Base with foreign income receipts and payments. The GDyn Model incorporates a new treatment of investment behavior and additional accounting relations to keep track of foreign ownership of capital.
- **GMig2 Data Base** – GMig2 extends the standard GTAP Data Base with international bilateral migration and remittances. The GMig2 Model is explicitly modeled to track the movement of workers and estimate the level of remittances.
- **Bilateral Time Series Trade Data** - Time-series merchandise trade data for 1995-2016 for all regions in the standard GTAP 10 Data Base.

Coming Soon!

- **GTAP-MRIO** - Extends the standard GTAP Data Base by additionally distinguishing bilateral trade and tariff flows by agents or so-called end-users, namely: firms, private household, government and investors.
- **Air pollution database** - Emissions for 9 substances are reported in the database: black carbon (BC), carbon monoxide (CO), ammonia (NH₃), non-methane volatile organic compounds (NMVOC), nitrogen oxides (NO_x), organic carbon (OC), particulate matter 10 (PM10), particulate matter 2.5 (PM2.5) and sulfur dioxide (SO₂).
- **GTAP-AEZ** - Global land cover and land use data directly constructed from publicly available geospatial maps (at 5-minute grid resolution), which are then aggregated for each AEZ-region and updated to each GTAP base year using national level output price, land use and land cover information from FAOSTAT.
- **Domestic Margins** - Extends the standard GTAP Data Base by distinguishing domestic trade and transport margin flows. Domestic margin services facilitate the delivery of products from: domestic producers to domestic users; domestic producers to the port of exit for exports; and port of entry of imports to domestic users.

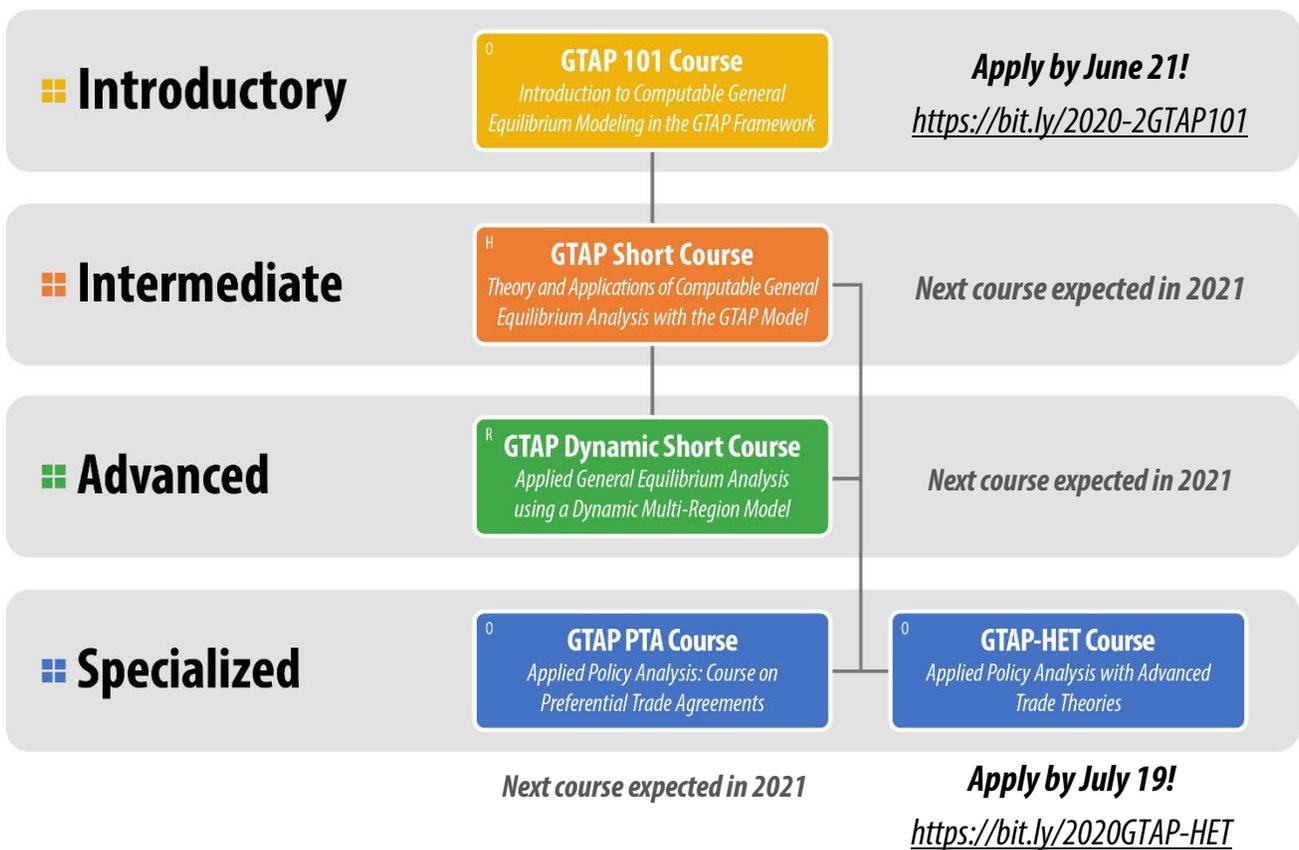

GTAP-U COURSES

GTAP-U Courses

The Center for Global Trade Analysis has two online course opportunities remaining in 2020. If you are looking for introductory training on CGE modelling in the GTAP framework ([GTAP 101 Course](#)) or more specialized training with the GTAP Firm Heterogeneity Model and its uses in trade policy analysis ([GTAP-HET Course](#)), check out the online learning opportunities below.

GTAP-U Course Structure

Delivery Method: O: Online | R: Residential | H: Hybrid (Online + Residential)

“Advancing Applied General Equilibrium Modeling”

Journal of Global Economic Analysis

- Provides an open access, peer-reviewed platform for publication and dissemination of innovations in applied general equilibrium modeling
- Publishes developments in theory, data, statistical analysis, methods, and teaching
- Enhances the credibility of AGE modeling by requiring replication of results during the peer-review process and, when possible, publication of new model code and data on the journal’s website
- Builds on and extends the high-impact, peer-reviewed GTAP Technical Paper Series

Focus and Scope

The *Journal of Global Economic Analysis* publishes papers reporting developments in theory, data, statistical analysis, methods and teaching in support of applied general equilibrium (AGE) modeling and provides a platform for researchers and teachers to access these innovations. Papers submitted to the *Journal of Global Economic Analysis* should be accompanied by model code and data files, as pertinent, and instructions to facilitate replication of results. Model, data and instruction files of accepted papers will be available to the public via the Journal's website. The *Journal of Global Economic Analysis* does not publish applications of existing datasets and models to new policy questions. Authors of application-focused manuscripts are encouraged to submit these studies to appropriate field journals. The *Journal of Global Economic Analysis* is an online-only periodical and is published by the Center for Global Trade Analysis.

Co-Editors

- **Thomas Hertel**, Purdue University
- **Niven Winchester**, Auckland University of Technology

Multi-scale Modeling of Sustainability in the Center for Global Trade Analysis

PURDUE UNIVERSITY
GLASS
Global to Local Analysis of Systems Sustainability

Meeting the Global Sustainable Development Goals on a Changing Planet with Limited Land and Water Resources
[Getting started](#)

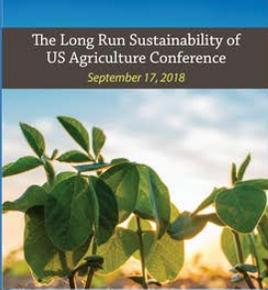

RESEARCH HIGHLIGHTS

Employing Global-to-Local Analysis of Systems Sustainability Approach

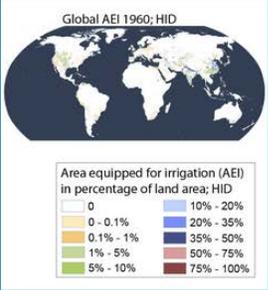

GLOBAL FUTURES
ASSESSING THE GLOBAL ECONOMIC IMPACTS OF ENVIRONMENTAL CHANGE TO SUPPORT POLICY-MAKING

Assessing the global economic impacts of environmental change to support policy-making. Check out the [summary report](#), [technical report](#) and a [Science paper](#)!

The Long Run Sustainability of US Agriculture Conference
September 17, 2018

The 2018 Conference on Long Run Sustainability of US Agriculture - understand and communicate the interplay between global change and local sustainability of US agriculture

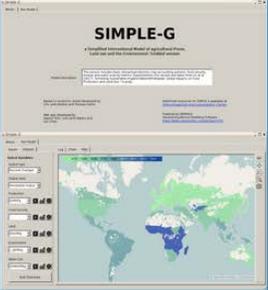

Global AEI 1960: HIT

Area equipped for irrigation (AEI) in percentage of land area, HIT

0	10% - 20%
0 - 0.1%	20% - 35%
0.1% - 1%	35% - 50%
1% - 5%	50% - 75%
5% - 10%	75% - 100%

Historical Irrigation Dataset (HIT) - A global dataset of the extent of irrigated land from 1900 to 2005

SIMPLE-G

SIMPLE-on-a-Grid (SIMPLE-G) - a multi-region, partial equilibrium model of gridded cropland use, crop production, consumption and trade.
